

ELECTRIC VEHICLE (EV) PROGRAM

A new era begins in your garage. Save money every time you charge your plug-in electric car by charging your car on off-peak hours. Plus, grab a rebate of up to \$200 on installing the charging station.

You'll wake up fully charged and get off to a great start-now and for many mornings to come.

Pierce Pepin Cooperative Services (PPCS) offers an option for charging your EV at home. The storage program offers our lowest, off-peak price. Additional outlets for your EV that are not off-peak outlets are prohibited when participating in this program.

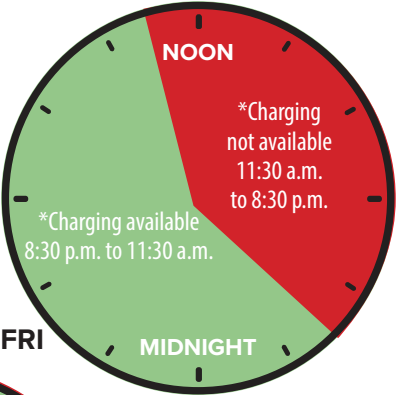

PPCS also offers a rebate of up to \$200 to cover the cost of installing a charger on the program.

OFF-PEAK STORAGE RATE

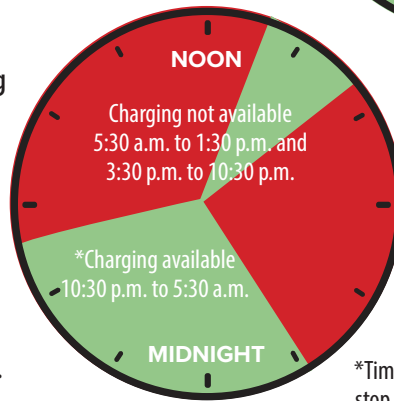

PPCS' storage rate offers members the lowest-cost off-peak electricity for charging an EV. Electricity for charging your EV is available Monday through Friday only during off-peak hours. Power will not be supplied outside of the off-peak hours and the charger must be hardwired into your circuit panel.

SUMMER • MON-FRI

WINTER • MON-FRI

*Times are approximate. Control start/stop are staged over half-hour periods.
